

I-Suite Patch 12-1 Release Notes

Date: July 30, 2012
Version: I-Suite 12.01.01

Description: The focus of this patch is to address several minor application issues impacting the field. All changes included in this patch are identified in the Summary Release Information section of this document.

Things to know prior to installing I-Suite Patch 12-1, Version 12.01.01

- There are two different patches available depending on your configuration and operating system. See chart below:

Software	Operating System	Description
I-Suite Patch 12-1 32	Windows XP and Windows 7 32 bit Operating System	For use on Windows 32 bit operating systems. To find your operating system, click the link below and follow instructions. http://support.microsoft.com/kb/827218
I-Suite Patch 12-1 64	Windows 7 64 Bit Operating System	For use on Windows 64 Bit operating systems. To find your operating system, click the link below and follow instructions. http://support.microsoft.com/kb/827218

Note: *Has not been tested on Windows Vista or Windows XP 64 Bit operating systems.*

- Recommend that this patch be installed on all computers running I-Suite 12.01.00.
- This patch can be applied to a server or client installation of I-Suite.
- System Administrative privileges are required to properly install this patch.
- This patch can be installed mid-incident.
- For both Server and Client computers, close the I-Suite application and all related windows on the local computer before installing this patch.
- It is recommended that a back-up of the I-Suite database be made prior to any application updates.
- The installation of I-Suite Patch 12-1 will replace the following files: ISuite.exe, Reports Folder.
- Opening the I-Suite application on the server computer, attaching a database, and creating a new database will update the database to version 12.01.08.

Please visit the I-Suite Web site for additional information (<http://isuite.nwcg.gov>).

Summary Release Information

The following table contains a summary of the changes included in this patch:

QC ID	Module	Process	Description
1733	Cost	Daily Cost	Changed "Delete" cost record functionality to "Recalculate" functionality to allow the user to delete and rebuild the cost record for a resource
1732	Cost	Reports	An apostrophe in the incident name will no longer cause an error when running Cost reports.
1741	Custom Reports	Views	Supply Items issued flag is available in the following Custom Report Views: <ul style="list-style-type: none"> • vResources • vBasicRpts • vPersons • vDemob • vContractorResources • v286 • v288
1737	DB Admin	Backups	An error will no longer occur that caused backups to fire every 1-2 minutes when selecting C:\documents and settings\user\my documents as a backup location.
1739	DB Admin	Password Recovery	The password recovery process for an unattached encrypted database can now be performed.
1731	DB Admin	Restore/Attach	An invalid password entered on a restore or attach will no longer leave rogue database files.
1734	DB Admin	ROSS Import	The ROSS import has been changed to no longer set the number of personnel on a parent record with subordinates. This was done to correct an issue with imports containing new members overwriting I-Suite number of personnel data.
1729	Resources	Add/Edit	An error will no longer occur on client installs when attempting to save a record after unselecting the Person and Contracted check boxes.
1738	Supply	Add Supply Item	An error will no longer occur when manually adding supply items.
1740	Supply	All	Error from a memory leak causing the application to crash has been partially addressed.

Patch 12-1 Release Notes

QC ID	Module	Process	Description
1736	Supply	Reports	Corrected issue with Property Status Report that allowed a trackable item to have two conflicting issue statuses.
1735	Supply	Reports	Correct Supply Reports are included in the Client Install.
1744	Supply	Notifications	Incorrect message stating resource has outstanding supply items will no longer display when generating invoices
1730	Time	Add/Edit Time Data	Running the Cost process will no longer remove the Hire Time on Contact resources.
Known Issue			
N/A	Time	Post Contract Time	A random guarantee amount is associating itself with random resources. Attempts were made to identify and correct the problem. Further testing is necessary to validate if the issue has been resolved.
