

I-Suite Patch 2005-2 Release Notes

Date: August 8, 2005

Release: I-Suite Patch 2005-2

Description: The primary focus of this patch is to correct the default accounting code problems and printing OF-288 invoices for crews. Please see attached table for additional changes included in this release.

Important things to know prior to installing patch 2005-2

- System administrative privileges are not required.
- The installation of I-Suite Patch 2005-2 will overwrite the following files.
 - c:\isuite\program files\its\its.exe
 - c:\isuite\program files\its\reports\ireport.exe

Please visit the I-Suite webpage for specific information on the installation process and user documentation <http://isuite.nwcc.gov>.

Refer to the following tables for specific information.

Change Category	Description
Bug	Application Error
Mod	Modification to an existing functionality
UI	User Interface
New	New functionality
Consistency	Functionality should be the same throughout the application

Application Change Identifier	Module/ Process Affected	Change Category	Description
673	ITS / Incident Account Code	Bug	<ul style="list-style-type: none"> When Managing Incident Accounts, you can no longer accidentally unselect the default account code and not be able to access your incident.
672; 671; 679; 680	ITS / Reports / OF-288	Bug	<ul style="list-style-type: none"> Can now delete an original invoice for crew members/Operators when the OF-288 is accessed by selecting the "Print OF-288" button from the Crew & Operator Post Time Screen. When printing OF-288's for crewmembers and one or more members already have a final invoice printed, you no longer get an "Invalid use of Null" error. When deleting last invoice for a crew and there are no invoices to delete the application will now display a more informative message. Printing an OF288 from the crew & operators tab on the post time screen will select the correct resource.
