

I-Suite Version 5.01.01 Release Notes

Date: June 2, 2005

Release: I-Suite 5.01.01

Description: The primary focus of this release is to allow the install process to set proper file permissions needed to run I-Suite on Windows XP with Service Pack 2. Please see attached table for additional changes included in this release.

Important things to know prior to installing version 5.01.01

- System administrative privileges are required to properly install I-Suite.
- The installation of I-Suite Version 5.01.01 will overwrite the previous version.
- To utilize an existing 2004 database, it must first be converted to 2005 using the Incident Merge/Split Program.

Please visit the I-Suite webpage for specific information on the installation process and user documentation <http://isuite.nwcg.gov>.

Refer to the following tables for specific information.

Change Category	Description
Bug	Application Error
Mod	Modification to an existing functionality
UI	User Interface
New	New functionality
Consistency	Functionality should be the same throughout the application

Application Change Identifier	Module/ Process Affected	Change Category	Description
434	Operating System	Mod	<ul style="list-style-type: none"> The I-Suite Installer will change the "isuite" folder rights to full control for the "everyone" group. The file c:\isuite\program files\bin\ISuiteFolderACL.exe is distributed to manually change the ISuite folder rights. NOTE: Administrative rights are needed to run this file.
435	Training Database	Bug	<ul style="list-style-type: none"> The training / test database (ISuiteTest2005) distributed with ISuite and on the website is updated to show accounting codes on the accrual report.
436	ITS	Mod	<ul style="list-style-type: none"> Posting time for an AD employee with a special code of "Day Off" defaults to 0 hours.
437	ITS	Bug	<ul style="list-style-type: none"> The Activity Date displays correctly on the Work/Rest Ratio report.
