

I-Suite AD Rate Updater Version 6.00.00 for the 2006 Pay Plan Release Notes

Date: March 28, 2006

Release: Version 6.00.00 of the AD Rate Updater is for I-Suite 2005 Databases

Description: The purpose of this application is to implement the revised Pay Plan for Emergency Workers (Casuals) that became effective March 23, 2006. It will update the selected I-Suite 2005 database by adding the new AD pay rates AD-A through AD-L for each of the current areas. (CONUS, Alaska, and Hawaii)

This application is designed to update only I-Suite 2005 databases. It will not update a database with a version prior to 2005. If this is needed, recommend upgrading to the current version of I-Suite. The 2006 version of I-Suite is scheduled for release in April 2006 and will include the new 2006 AD pay rates.

Important things to know prior to running this update

- System administrative privileges may be required.
- ITS (Incident Time System) must be closed before running this application.
- This application must be run on the server computer with the 2005 database attached.
- It only updates the selected 2005 database.
- It must be run for each I-Suite 2005 database requiring the new AD pay rates.
- This update may be applied at anytime during an incident with no negative impacts to the database.

Steps to update an I-Suite 2005 Database

- Download or copy ISuite_ADRateUpdater.exe to c:\isuite on the server computer.
- Launch the application by double clicking on the file name.
- Select an attached 2005 database from the drop-down list of attached databases.
- Click the "Update the Selected Database" button.
- Click the "OK" button on the "Update Successful" message.
- Close the application by clicking on the "x" in the upper right corner.

Please visit the I-Suite webpage for additional information and to download the application.
