### Report Notes

If time in the Demob class is running short, only have the students generate one report of each type.

In order for the reports to generate correctly, the students should make sure the following settings are defined:

#### Tentative Poster

Use the date range 5/28-31.

## Available for Release

The students can print the report for any of the resources defined in the **Resource Demob Information** chart. Students must first enter the Tentative Release information for each resource from the ICS 213s.

Make sure the **Resources Selected in Grid** option is checked before selecting the resources and generating the report. In order for any **Quals** to show in the report, the **Available for Reassignment** checkbox must be checked in the **Tentative Release** area on the Demob window.

## Air Travel Requests

In order for any **Quals** to show in the report, the **Available for Reassignment** checkbox must be checked in the **Tentative Release** area on the Demob window.

Students should check the checkboxes for those **Travel Questions** with a **Yes** response for each resource traveling by Air or A/R (O-11 and O-100.7).

The following are examples of how the Demob window should be completed for those resources traveling by Air or A/R:

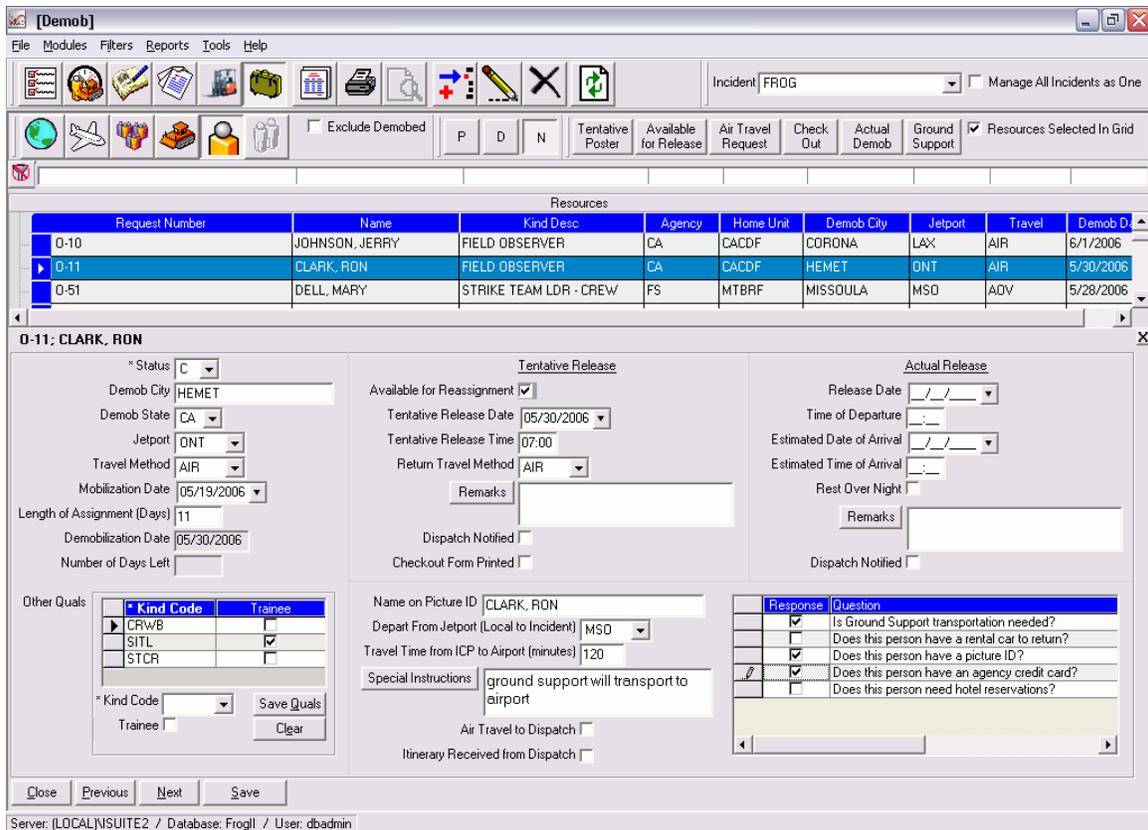

The screenshot shows the Demob software interface. At the top, there is a menu bar (File, Modules, Filters, Reports, Tools, Help) and a toolbar with various icons. Below the toolbar, there is a status bar showing the incident name 'FROG' and a checkbox for 'Manage All Incidents as One'. The main area is divided into several sections:
