

## I-Suite Patch 2007-5 Release Notes

---

**Date:** September 27, 2007  
**Version:** I-Suite 7.01.05

**Description:** The primary focus of this release is to complete several outstanding items and to fix recently identified issues in the application.

### Things to know prior to installing I-Suite 7.01.05

- Includes all previous patches released since I-Suite version 7.01.01.
- Recommend that this patch be installed on all computers running I-Suite 7.01.01 with or without previous patches.
- This patch can be applied to a server or client installation of I-Suite.
- System Administrative privileges are NOT required to properly install this patch.
- This patch can be installed mid-incident.
- Close the I-Suite application and all related windows on the local computer before installing this patch.
- The installation of I-Suite version 7.01.05 will replace all report files (\*.rpt) and the ISuite.exe file.
- It is recommended to back-up the I-Suite database prior to any application updates.
- The users ini file located in "c:\Program Files\ISuite\User\_Profiles" folder must be deleted for the new supply column to display in the Demob module.

Please visit the I-Suite Web site for additional information (<http://isuite.nwcg.gov>).
