

## I-Suite Patch 2008-1 Release Notes

---

**Date:** June 17, 2008  
**Version:** I-Suite 8.01.03

**Description:** The primary focus of this patch is to correct a recently identified issue in the ROSS import process.

### Things to know prior to installing Patch 2008-1

- Recommend that this patch be installed on all computers running I-Suite 8.01.02.
- This patch can be applied to a server or client installation of I-Suite.
- System Administrative privileges are NOT required to properly install this patch.
- This patch can be installed mid-incident.
- Close the I-Suite application and all related windows on the local computer before installing this patch.
- The installation of this patch will replace the ISuite.exe file.
- It is recommended to back-up the I-Suite database prior to any application updates.

Please visit the I-Suite Web site for additional information (<http://isuite.nwcg.gov>).

## Summary Release Information

The following table contains a summary of the changes included in this patch:

QC #	Module	Process	Description
448 449 451	DB Admin	ROSS Import	<ul style="list-style-type: none"><li>• Manually rostered resources are no longer being moved to the Parent level after a ROSS Import.</li><li>• The “Validate Matches 2” step, ‘Matching resources based on request number only’, now requires the user to manually match a ROSS resource to an I-Suite resource.</li><li>• Importing a person to be rostered to an existing S/T component imports to the S/T Parent level.</li></ul>
450	Time	Post Time	<ul style="list-style-type: none"><li>• An error no longer occurs when selecting or posting time for a crew member with the “All Personnel” filter selected.</li></ul>
